Activity Report

ACM Student Chapter – GM University

AI Awareness Program & Project

Demonstration at Government School

1. Introduction

As part of the outreach and social responsibility initiative of the GMU ACM Student Chapter, our team visited a nearby government school to conduct an AI Awareness Program and demonstrate student innovation projects.

The objective was to introduce school students to modern technologies, Artificial Intelligence, and smart systems in a fun, engaging, and interactive way.

2. Event Details

- **Organized by:** Dept. of **AIML** under the GMU ACM Student Chapter, GM University, Davangere
- **Date:** 20/11/2025, 10:30 am to 1:00 pm
- **Venue:** SS Government Urdu School, Azad Nagar, Davangere
- **Participants:** School students and teachers
- **Duration:** Approximately 3 hours
- **Team:** GMU ACM core student members

3. Objectives of the Visit

- To create awareness about Artificial Intelligence among school students
- To demonstrate real-world technology projects built by GMU students
- To inspire school students towards science, technology, and innovation
- To make learning interactive rather than theoretical

4. Program Flow & Activities

The program was conducted based on a structured AI awareness flow mentioned in the activity document

AI AROUND US , simplified for school-level understanding:

a) Ice-Breaker Session

We started with interactive questions like:

- Who uses YouTube daily?
- Who uses face unlock?
- Who uses Google Maps?

This helped build engagement and made students more comfortable.

b) Introduction to Artificial Intelligence

AI was explained in simple terms using real-life examples like:

- Face unlock
- Google Assistant
- YouTube recommendations
- Maps navigation

c) PPT and Video Session

A short presentation and animated video were shown to explain:

- What is AI
- AI in daily life
- How AI helps people

d) Live AI Demonstrations

We performed live demos such as:

- Talking to AI chatbots
- Object identification using camera
- Face filter and AI recognition demos

These activities were inspired from the interactive approach described in the document

5. Project Demonstrations Conducted

Our team showcased several innovative projects designed by GMU students:

5.1 Smart Irrigation System

We demonstrated how automatic irrigation works using sensors to monitor soil moisture and supply water only when required.

This helped students understand how technology can help farmers save water and increase crop efficiency.

5.2 Machine Picker and Dropper

We showed a working model of an automatic machine that can pick objects and place them at another location, explaining its applications in industries and robotics.

5.3 GMU Tutor Website

We presented the GMU Tutor Website, which helps students access study materials, tutorials, and learning content easily through an online platform.

5.4 Object Identifier App

We demonstrated an AI-based object identification application that recognizes objects using a camera and displays their names, which excited students a lot.

6. Student Participation

Students actively participated by:

- Asking questions
- Volunteering for live demos
- Sharing examples of AI they use daily
- Trying object recognition and filter tools

Their curiosity and enthusiasm showed their interest in technology and future learning.

7. Outcome of the Activity

- Students gained basic understanding of AI concepts
 - They learned how real-world projects are built
 - Increased interest towards technology, robotics, and innovation
 - The school appreciated our initiative and student involvement
-

8. Conclusion

The program successfully introduced government school students to the world of Artificial Intelligence and modern technology in a simple, enjoyable manner. Activities and demonstrations conducted by the GMU ACM Student Chapter made the session engaging and impactful.

Such initiatives not only benefit school students but also help college students develop communication, leadership, and social responsibility skills.
