Report on “Code Challenge Quest” (Logic Building Challenge)

The Department of Artificial Intelligence and Machine Learning organized a fun and educational activity called “**Code Challenge Quest (Logic Building Challenge)**” for 3rd semester AI-2B students on **05/11/2025**.

The main goal of the activity was to help students improve their **logical thinking, problem-solving, and programming skills gradually**. It also aimed to prepare them for future computer science courses and coding competitions.

The activity started at **1:30 PM**, students worked on solving logic-based programming problems **individually or in small teams (3 to 4 Members)**.

Their programs were judged based on **correctness, efficiency, clarity, and logic**. The problems included topics like **loops, recursion, data structures, and algorithms** and the encouraged students to write **clean and creative code** and did not allow the use of any unauthorized tools or websites.

The students showed **great enthusiasm and creativity**. Many came up with **smart recursive solutions** and **optimized algorithms**. Most participants solved the basic problems well, but some found it hard to handle complex or edge cases.

For further activity, the organizers suggested adding **peer-review sessions, tiered problem levels, and pre-contest workshops** to help students prepare better.

Outcomes

1. Better understanding of algorithmic problem-solving
2. Improved teamwork and communication
3. Stronger student interaction
4. Plans to start regular coding club activities and workshops

Overall, **“Code Challenge Quest”** was a **successful and inspiring event**. It helped students **develop logical thinking and programming skills** in a fun and motivating way.

Conducted Team:

1. Vruthvik V
2. Ayush Patil
3. Harsh S R
4. Sanjana Rodda
5. Preethi v b
6. A M Supreetha
