CONFLUENCE 2025

International Conference on Advancing Sustainability through Multidisciplinary Research and Innovation

6th, 7th & 8th November 2025

Track1 Theme: Computing and Intelligence: Innovations Shaping the Digital Era

Session: 5

Coordinated by: Department of Artificial Intelligence and Machine Learning

Venue: CSE Seminar Hall

Time: 9:30 AM – 1:00 PM

Date: 8th November 2025

Particulars	Details
Conducted on	8 th November 2025
Session Chair	Dr. Narendra V. G Professor, School of Computer Science, MIT, Manipal
Co-Session Chair	Dr. Nasreen Taj M. B Associate Professor, Department of AIML, G. M. University, Davanagere
Conveners	Dr. Sanjay Pande M. B – Director, SCST, GMU Dr. Shwetha Marigoudar – Dean, FCIT, GMU Dr. Asha K – HoD, Department of AIML, SCST, GMU Dr. Shivanagowda G. M – HoD, Department of CSE, SCST, GMU Dr. Neelambike S – HoD, Department of ISE, SCST, GMU
Coordinators	Mrs. Chaitra A , Assistant Professor, Department of AIML, SCST, GMU Ms. Anusha N. L Assistant Professor, Department of AIML, SCST, GMU

Profile of Dr. Narendra V. G

Designation: Professor, School of Computer Engineering

Institution: Manipal Institute of Technology, Manipal Academy of Higher Education (MAHE), Manipal, Karnataka, India

Email: narendra.vg@manipal.edu

Phone: +91 9448422841

Professional Overview

Dr. Narendra V. G is a Professor in the Department of Computer Science and Engineering at the Manipal Institute of Technology, MAHE, Manipal.

He has over **26 years of academic experience** and **10 years of research experience**, specializing in **food quality evaluation using image processing and soft computing techniques**.

He has presented his research work at several international conferences in Japan, Malaysia, New Zealand, Vietnam, the UK, China, Greece (Heraklion), and Indonesia.

He has published **40 papers in peer-reviewed journals** and **50 papers in international conferences**.

He has guided **two Ph.D. scholars** and is currently supervising **six Ph.D. students**. His recent publication, a **review article in ACM Computing Surveys**, has been published in a journal with an **impact factor of 28**.

Currently, he is the **Principal Investigator** for a funded project titled “*Indian Language to Indian Language Machine Translation*” supported by **MeitY, Government of India**, with a **grant of INR 80.41 Lakhs**.

Academic Qualifications

- Ph.D., Manipal Academy of Higher Education (MAHE), Manipal, Karnataka, India – 2017
- M.Tech. in Computer Science and Engineering, Visvesvaraya Technological University, Karnataka – 2000
- B.E. in Computer Science and Engineering, Karnataka University, Dharwad – 1997

Research Interests

- Food quality evaluation using image processing and soft computing
 - Computer vision-based grading and sorting of agricultural and food products
 - E-agriculture and smart farming using Blockchain Technology and IoT
 - Machine Translation, Natural Language Processing, and AI-based linguistic computing
-

ಜಿ. ಎಂ. ವಿಶ್ವವಿದ್ಯಾಲಯ

GM UNIVERSITY

P. B. Road, Davanagere – 577 006 KARNATAKA | INDIA

Research Contributions

- Published 40 papers in peer-reviewed international journals
- Presented 50 papers at international conferences
- Guided 2 Ph.D. scholars and currently supervising 6 Ph.D. students
- Published a review article in *ACM Computing Surveys* (Impact Factor: 28)
- Principal Investigator for “*Indian Language to Indian Language Machine Translation*” (Grant: INR 80.41 Lakhs, MeitY, Govt. of India)

Patents and Intellectual Contributions

- Filed patents on automated food quality grading systems using image processing and IoT-based agricultural monitoring frameworks
- Developed innovative algorithms for texture and colour feature extraction in food quality assessment
- Contributed to national and international collaborations in AI-driven agriculture and multilingual computational linguistics
- Authored several papers in artificial intelligence, computer vision, and agricultural automation

Innovation, Mentorship, and Leadership

- Principal Investigator for Government of India-funded project
- Mentoring research scholars and student teams in AI, IoT, and Smart Agriculture
- Guided student innovation projects recognized in **Smart India Hackathon** and university challenges
- Established academia–industry collaborations in AI, Blockchain, and AgriTech
- Contributed to modernization of AI and ML labs at MIT, MAHE

Workshops and Faculty Development Programmes (FDPs)

- Organized national and international workshops on **AI, Image Processing, IoT, and Blockchain**
- Served as a resource person for FDPs on **Machine Learning, Soft Computing, and Computer Vision**
- Delivered invited lectures at several academic institutions and professional training programs across India
- Actively involved in **curriculum design** and **Outcome-Based Education (OBE)** initiatives at MAHE

Recognitions

- Commendation for excellence in research and publications at MAHE
- Recognized for outstanding presentations at international conferences (Japan, Malaysia, UK)
- Recipient of **Best Research Paper Awards** in image processing and AI applications in agriculture
- Served as **Session Chair** and **Technical Committee Member** in IEEE and Springer conferences
- Reviewer and editorial board member for reputed international journals in **Computer Vision, AI, and Agricultural Informatics**

P. B. Road, Davanagere – 577 006 KARNATAKA | INDIA

Abstracts

The session featured presentations of the following research papers, arranged by their respective Paper IDs:

Paper ID: T1024

Title: An AI-Powered Career Guidance Framework for Students in Developing Countries Using Predictive Analysis and NLP-Based Recommendation Systems

Authors: Abhishek M. Aradhyamth*, Nayana K

Affiliation: GM School of Advanced Studies, Deep Learning, GM University, Davanagere – 577006, Karnataka, India

Email: abhishekaradhyamath17@gmail.com

Abstract:

In developing countries, students often face challenges in accessing timely, reliable, and personalized career guidance due to limited infrastructure, shortage of trained counsellors, and socioeconomic barriers. This leads to mismatched career choices, underemployment, and skill gaps in the workforce. This paper proposes an AI-powered framework integrating intelligent chatbots, predictive analytics, and personalized recommendation engines to guide students in selecting suitable academic and career pathways. The system leverages student performance data, psychometric assessments, and labor market trends to provide real-time, context-aware recommendations. It also includes local language support and low-bandwidth optimization to ensure accessibility in rural regions. Results show that AI-driven guidance systems enhance student awareness, improve decision-making, and promote equitable access to career counselling in developing countries.

Keywords: Artificial Intelligence (AI), Career Guidance, Natural Language Processing (NLP), Machine Learning (ML)

Paper ID: T1025

Title: Automated Food Type Classification for Accurate Calorie Estimation Using Machine Learning Techniques

Authors: Pradeep T*, Nayana K

Affiliation: GM School of Advanced Studies, Deep Learning, GM University, Davanagere – 577006, Karnataka, India

Email: pradeeptpr1993@gmail.com

Abstract:

Accurate estimation of calorie intake is essential for nutrition management and lifestyle tracking. Traditional calorie logging methods are manual and prone to human error. This work proposes an automated food-type classification and calorie estimation system using Machine Learning. The model uses image pre-processing, feature extraction, and classification with CNN and SVM. Once identified, the corresponding calorie information is retrieved from a nutritional database. Experimental results show strong performance in food

ಜಿ. ಎಂ. ವಿಶ್ವವಿದ್ಯಾಲಯ

GM UNIVERSITY

P. B. Road, Davanagere – 577 006 KARNATAKA | INDIA

categorization and calorie estimation under different conditions. Designed for scalability and mobile use, the system provides an efficient solution for dietary tracking and health monitoring.

Keywords: Food Classification, Calorie Estimation, Convolutional Neural Network (CNN), Support Vector Machine (SVM), Machine Learning

Paper ID: T1027

Title: An AI-Driven Telemedicine Framework for Reducing Healthcare Inequities in Rural Areas

Authors: Chandana S

Affiliation: GM School of Advanced Studies, Deep Learning, GM University, Davanagere – 577006, Karnataka, India

Email: chandana2k02@gmail.com

Abstract:

Healthcare inequities between urban and rural populations remain a major challenge. This paper presents an AI-driven telemedicine framework integrating IoT-enabled wearables, remote diagnostic kits, and intelligent chatbots for real-time monitoring and consultation. Global implementations such as Practo (India), Teladoc (USA), and Babylon Health (UK) highlight the potential of AI-assisted teleconsultations. The framework enhances disease prediction, preventive care, and triaging efficiency while addressing data privacy and connectivity challenges. The findings emphasize AI's transformative role in achieving equitable healthcare and bridging the rural–urban healthcare divide.

Keywords: Telemedicine, Artificial Intelligence (AI), Internet of Things (IoT), Healthcare Equity

Paper ID: T1028

Title: Real-Time Road Surface Damage Detection Using Deep Learning-Based Computer Vision

Authors: Spoorthi B*, Nayana K

Affiliation: GM School of Advanced Studies, Deep Learning, GM University, Davanagere – 577006, Karnataka, India

Email: spoorthibs005@gmail.com

Abstract:

Maintaining road quality is essential for safety and cost efficiency. Traditional inspection methods are slow and expensive. This paper proposes a CNN-based system for automatic road damage detection. The model identifies defects such as cracks, potholes, and rutting using video or image data from mounted cameras. Trained on a diverse image dataset, the model performs robustly under varying lighting and weather conditions. It supports GPS integration for real-time location marking and alerts. The system offers a practical and scalable approach to proactive road maintenance.

Keywords: Road Damage Detection, Pothole Detection, Crack Identification, Deep Learning, CNN

ಜಿ. ಎಂ. ವಿಶ್ವವಿದ್ಯಾಲಯ

GM UNIVERSITY

P. B. Road, Davanagere – 577 006 KARNATAKA | INDIA

Paper ID: T1107

Title: Deep Learning-Based Classification of Plant Leaf Diseases Using Dual Focus Attention Mechanism

Authors: Jayashree R*, Kusuma Kumari B. M.

Affiliation: Department of Studies and Research in Computer Applications, Jnanasiri Campus, Tumkur University, Tumkur – 572118, Karnataka, India

Email: jayashreerameshg@gmail.com

Abstract:

This paper proposes a Dual Focus Attention Module (DFAM) combining Local Focus Path (LFP) and Global Focus Path (GFP) to enhance plant disease classification. Embedded in CNN architectures, DFAM improves feature representation and model accuracy. Experimental results show that DFAM-enhanced CNNs outperform SE and CBAM models in accuracy, precision, and F1-score while remaining lightweight and interpretable. The model supports real-time deployment for precision agriculture.

Keywords: DFAM, CNN, Deep Learning, Plant Disease Detection, Attention Mechanism

Paper ID: T1096

Title: An Effective Approach to Identify Customer Behavioural Analysis Using Multiple Data Networks

Authors: Shivakumara B. G.*, Chethan Chandra S. Basavaraddi

Affiliation: Department of Computer Science and Engineering, GM University, Davanagere – 577006, Karnataka, India

Email: shivakumar.prasad8@gmail.com

Abstract:

This study aims to analyse customer behaviour using multiple data networks. Data collected from demographics, transaction history, and social media activity is used for behavioural segmentation and predictive marketing. The approach involves data collection, preprocessing, analysis, and visualization for actionable business insights. It improves customer targeting, reduces costs, and enhances user experience.

Keywords: Data Networks, Data Analytics, Customer Behaviour, Segmentation

Paper ID: T1103

Title: Next-Generation Predictive Maintenance Through AI Integration

Authors: Thippeswamy G. N.*, Neelambike S., Sanjay Pande M. B.

Affiliation: Departments of ISE and CSE, GM University, Davanagere – 577001, Karnataka, India

Email: neelais@gmail.com

Abstract:

This paper explores how Artificial Intelligence can optimize predictive maintenance in facility operations. It reviews recent studies applying AI-based predictive models to reduce operational overhead and improve

ಜಿ. ಎಂ. ವಿಶ್ವವಿದ್ಯಾಲಯ

GM UNIVERSITY

P. B. Road, Davanagere – 577 006 KARNATAKA | INDIA

system reliability. Findings reveal that integrating AI enables data-driven decision-making, accurate fault forecasting, and proactive maintenance scheduling, ultimately reducing costs and downtime.

Keywords: Predictive Maintenance, AIOps, Forecasting, Real-Time Data, Proactive Maintenance

Paper ID: T1023

Title: Explainable AI for Air Pollution Prediction: A Deep Learning Approach with SHAP-Based Interpretability

Authors: Akshata G. Kharad*, Nayana K

Affiliation: GM School of Advanced Studies, Deep Learning, GM University, Davanagere – 577006, Karnataka, India

Email: gkakshata10@gmail.com

Abstract:

This paper presents an air quality prediction framework using Long Short-Term Memory (LSTM) networks for forecasting pollutants such as $PM_{2.5}$, PM_{10} , NO_2 , and CO. Explainable AI (XAI) with SHAP values is used for interpretability, identifying key features and patterns. Evaluation using MSE, RMSE, MAE, and R^2 shows strong accuracy and transparency. The framework supports real-time prediction and explainability for environmental management and public health.

Keywords: LSTM, Air Quality Prediction, SHAP, Explainable AI, Deep Learning

Summary Report

Event: International Conference on Advancing Sustainability through Multidisciplinary Research and Innovation

Track1: 1

Date: 8th November 2025

Venue: CSE Seminar Hall

Theme: *Computing and Intelligence: Innovations Shaping the Digital Era*

The fifth session of **CONFLUENCE 2025** was organized by the **Department of Artificial Intelligence and Machine Learning** on **8th November 2025** at GM University, Davanagere. The session commenced with a warm welcome, creating an enthusiastic atmosphere for the day's proceedings.

The event began with a formal address to the **Guest of Honour, Dr. Narendra V. G**, Professor, MIT, Manipal. As a gesture of appreciation, a bouquet and memento were presented to him.

The session then moved to paper presentations. Eight participants showcased innovative research in Artificial Intelligence and Machine Learning, addressing real-world challenges. Each presenter was evaluated based on clarity, innovation, technical content, and presentation skills. The panel provided constructive feedback and appreciated the participants for their research quality.

The **Best Presenter Award** for Session-5 was presented to **Ms. Akshata G. Kharad** for her paper titled *"Explainable AI for Air Pollution Prediction."*

Subject: Appreciation for Delivering the Keynote/Invited Talk at Confluence 2025

Dear Sir/Madam,

On behalf of GM University, Davanagere, and the Organizing Committee of Confluence 2025, we express our sincere appreciation for your gracious presence and valuable contribution as the Keynote/Invited Speaker at the conference.

Your keynote/Invited address on "Cyber-Security – Challenges and Opportunities."

was deeply insightful and intellectually stimulating. It provided the participants with an in-depth understanding of emerging trends and inspired thoughtful discussions among scholars, faculty members, and students.

We truly value the time and effort you devoted to sharing your expertise with our academic community. Your participation significantly contributed to the success and prestige of Confluence 2025, and we are honored to have had the opportunity to host you at our University.

We look forward to continued association and collaboration in future academic and research initiatives.

With warm regards,

Dr. Bharath K N
