Report on “Creative Prototype Challenge” (*Cardboard City Challenge & Spoon/Straw Robot Model*)

The Department of Artificial Intelligence and Machine Learning organized an engaging and skill-enhancing creative activity titled “**Creative Prototype Challenge**” for engineering students on **28/11/2025 at CR-055 (Third Floor)**. The main objective of the activity was to encourage students to apply engineering thinking, creativity, teamwork, and sustainable design concepts by building functional prototypes using waste and recyclable materials.

The event included two parallel activities:

1. Cardboard City Challenge:

Students were instructed to create a miniature model of a city using only waste cardboard boxes, lids, paper cups, and plastic covers.

The goal of the activity was to help students **understand structural design, layout planning, teamwork, and prototype visualization.**

Teams of **4 or 5 members** collaboratively **designed roads, bridges, buildings, and important city structures.** The challenge emphasized **stability, neatness, connectivity, and innovative use of waste materials.**

2. Spoon/Straw Robot Model:

Participants were asked to build a robot figure using used plastic spoons, straws, bottle caps, and cup lids.

This activity encouraged students to **practice basic mechanical thinking, balance & stability analysis, material usage, and component assembly.**

Students showcased high creativity by designing robots with movable parts, strong joints, and well-balanced structures.

The challenge ensured that only waste materials were used, **promoting sustainability and engineering creativity.**

The activities began at 1:45 PM, and all students actively participated by forming teams, planning designs, and building their models within the given time. Faculty coordinators evaluated each team based on **creativity, structural stability, use of waste materials, teamwork, and overall presentation quality.**

The students displayed **great enthusiasm, innovative thinking, and strong team coordination.** Some teams demonstrated excellent engineering design by creating stable structures, while others experimented

with creative shapes and mechanisms in their robot models.

For future activities, the faculty suggested adding **pre-activity demos, improved stability-testing methods, and short presentation sessions** to help students articulate their design concepts more effectively.

Outcomes:

1. Improved understanding of creative engineering and prototype building.
2. Enhanced teamwork, coordination, and communication skills.
3. Better awareness of sustainability and reuse of waste materials.
4. Increased student engagement and interest in hands-on engineering activities.
5. Plans to introduce regular prototype/design challenges in upcoming semesters.

Overall, the **“Creative Prototype Challenge”** was a successful and highly motivating event. It provided an opportunity for students to convert waste into creative models while applying engineering thinking. The activity helped students **gain confidence, develop structural design skills, and work collaboratively in a fun and meaningful environment.**

Conducted Team:

1. Vrushab M S
2. Pratham G R
3. Puneeth Herrur

Creative Prototype Activities – Registration & Attendance Form

Please fill out this form to register for the upcoming Creative Prototype Activities scheduled on **28-11-2025 at 1:45 PM in CR-055 (Third Floor)**.

Attendance is mandatory.

Activities:

1 Cardboard City Challenge

2 Spoon/Straw Robot Model

Each team must have **3 to 5 members**.

** Indicates required question*

1. Email *

2. Activity Selection *

Mark only one oval.

☐ Cardboard City Challenge

☐ Spoon/Straw Robot Model

3. Section *

Mark only one oval.

☐ AI1A

☐ AI1B

☐ AI1C

4. Team Name (Example: Creative Sparks, Innovators 5, Robo Builders.....) *

5. Number of Members in Your Team *

Mark only one oval.

☐ 3

☐ 4

☐ 5

6. Names of All Team Members With USN *
