Report on “Debug the Code”

The Department of Artificial Intelligence and Machine Learning organized a fun and educational activity called “**Debug the Code**” for 1st semester AI-1A students on **07/11/2025**.

The main objective of this activity was to identify, analyze, and correct errors (bugs) in a given code. The goal was to improve logical thinking, enhance problem-solving skills, and understand the process of debugging in software development.

The activity started at **1:30 PM**, students worked on solving logic-based programming problems **in groups (5 to 6 Members)**.

Their programs were judged based on **correctness, efficiency, clarity, and logic**. The problems included topics like **C programming (data types, operators, loops, syntax) and HTML (structure, syntax, tags, attributes)** and the encouraged students to find the errors in the code and write **clean and correct code** and did not allow the use of any unauthorized tools or websites.

The students showed **strong interest and creativity** throughout the activity. Many students developed efficient solutions using concepts such as **data types, loops operators, syntax, tags, attributes and structure**. Most students were able to debug and solve the **basic C and HTML programming** problems successfully, while a few faced challenges in handling complex logic or cases.

For further activity, the organizers suggested adding **pre-contest workshops** to help students prepare better.

Outcomes

1. Improved logical thinking and problem-solving skills.
2. Improved teamwork and communication
3. Stronger student interaction

4. Enhanced understanding of basic C programming and HTML concepts.
5. Developed efficiency in identifying and fixing code errors.

Overall, **“Debug the Code”** was a **successful and inspiring event**. It helped students **develop logical thinking and programming skills** in a fun and motivating way.

Conducted Team:

1. Srujan M H
2. Suhas P
3. Poojitha S K
4. Pooja P P
5. Rakshitha J R
6. Rakshitha
7. Uma B
