Google Gemini Student Ambassador – Hackathon Report

Event Details

- **Activity Name:** Google Gemini Student Ambassador Hackathon
 - **Organized By:** Dept. of AIML – Rohan B, Chandrashekar L, Vivek P
 - **School:** School of Computer Science and Technology
 - **Department:** AI & ML
 - **Participants:** Students of GMU Campus
 - **Date:** 04/11/2025
 - **Venue:** Department of AIML
-

Objective of the Activity

The Google Gemini Student Ambassador Hackathon was organized to promote innovation, teamwork, and practical learning among GM University students.

The main objective was to give participants hands-on experience in exploring and building solutions using Google's Gemini AI platform.

Hackathon Themes

1. **AI for Campus Life**
 2. **AI & Robotics**
 3. **Sustainability & Environment**
 4. **Productivity & Collaboration**
 5. **Tech for Social Good**
-

Rules & Guidelines

Registration & Team Formation

1. Teams must consist of **2–4 student members**.
2. All participants must complete registration before the event begins.

Judgment Criteria

1. Innovation & Creativity – **20 points**
2. Technical Execution – **20 points**
3. Impact & Relevance – **20 points**
4. Presentation & Communication – **15 points**
5. Completeness & Polish – **15 points**
6. Team Collaboration – **15 points**

Outcomes of the Event

- Students gained practical experience using Google Gemini AI tools.
- The event improved creativity, teamwork, and real-world problem-solving skills.
- Participants developed innovative AI-based solutions for various challenges.
- Students enhanced their technical knowledge and presentation abilities.
- The hackathon encouraged a culture of innovation, collaboration, and continuous learning across the GMU campus.

Conclusion

The Google Gemini Student Ambassador Hackathon was a successful and impactful event. It motivated students to explore how artificial intelligence can solve real-world problems.

Participants showcased technical creativity, teamwork, and project execution skills. The event increased awareness of Google Gemini tools and highlighted their role in innovation and automation.

Overall, the hackathon strengthened the AI-driven research and innovation culture within GM University.

1. AI Superhero on Campus – AI for Campus Life

Empowering Smart Campuses through Intelligent Systems

Imagine a campus where AI enhances everyday moments—from smart attendance and academic support to AI-driven cafeteria management and security.

This theme invites students to build solutions that make campus life efficient, interactive, and intelligent.

Keywords: Smart campus, AI assistants, academic analytics, intelligent scheduling, student engagement.

2. AI & Robotics

The Fusion of Intelligence and Motion

This theme explores how AI combines with robotics to create autonomous systems—delivery robots, robotic lab assistants, drone surveillance, and more.

Participants were encouraged to design robots that think, sense, and act.

Keywords: Robotics, automation, computer vision, reinforcement learning, mechatronics.

3. Sustainability & Environment

Tech-Driven Green Innovation for a Better Tomorrow

Students were encouraged to design AI-, IoT-, and data-driven solutions that address environmental challenges such as waste management, clean energy, smart farming, and pollution control.

Keywords: Sustainable tech, renewable energy, smart agriculture, climate intelligence, pollution control.

4. Productivity & Collaboration

Reimagining Workflows for the Digital Age

This theme focuses on building AI tools that improve teamwork, automate tasks, and increase productivity—like intelligent task managers, language assistants, or team dashboards.

Keywords: Automation, workflow optimization, AI assistants, collaboration platforms.

5. Tech for Social Good

Innovation with Purpose, Impact with Heart

Students explored ideas that create positive social impact in healthcare, education, accessibility, rural development, and safety.

The goal was to use technology to uplift communities and improve lives.

Keywords: Social impact, accessibility tech, healthcare AI, rural development, safety solutions.

Final Deliverables

- AI-based prototypes or project presentations using Google Gemini tools
- Problem statements with innovative solutions
- Team reports and presentation slides showing workflow and outcomes
- Demonstration videos or posters of the projects
- Evaluation sheets and judge/mentor feedback summaries
