Placement Activity - Report on "Logical Reasoning"

Class: AI1C

Date: 13-11-2025

Time: 1:30 to 4 PM

Activity: Logical Reasoning

A coding activity was conducted by the Department of AIML for AI1C – 1st Semester AIML students to enhance their programming and problem-solving skills. The event was organized by V Semester AIML students for their juniors. The students displayed great enthusiasm and creativity.

"We conducted a logical reasoning activity for the students, with the aim of helping them improve their thinking and problem-solving skills. The workshop was designed to make students understand how to look at a situation, analyse it properly, and find the correct answer using logical steps. To make the session more engaging, we organised different activities such as a quiz, a treasure hunt, and video listening and analysis tasks.

The quiz helped the students check how well they could recognise patterns, understand sequences, and apply logic to simple questions. The treasure hunt was one of the most exciting parts of the workshop, as it required the students to follow clues, think critically, and work together as a team to reach the final location. The video activity allowed the students to watch short clips and identify logical connections, hidden clues, and the correct conclusions based on what they observed.

All the activities were planned creatively so that students could learn logical reasoning in an enjoyable, stress-free environment. The workshop helped the students become more confident, encouraged them to participate actively, and gave them a better understanding of how logical thinking can be used in studies, real-life situations, and future problem-solving tasks. Overall, the workshop was a successful learning experience that combined fun, creativity, and skill development."

Outcomes:

- Students became more confident in solving simple logic questions.
- They learnt how to work as a team.
- Their teamwork improved during the treasure hunt.
- The video activity helped them watch carefully and understand better.
- They learned how to find clues and connect ideas.

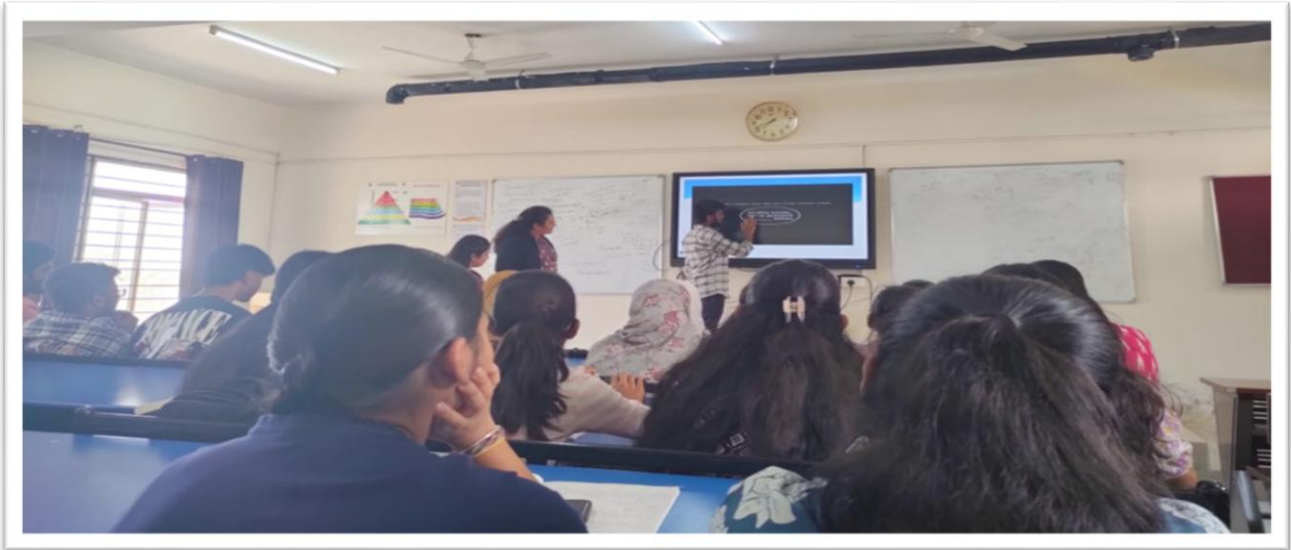

Overall, "Logical Reasoning" was a great success and a really fun way for students to test.

Faculty Coordinator:

- Ms. Kavya N. S (Lecturer)

Student Coordinators:

1. Aslesha Prakash Gowda
2. Bhavana M. Varada
