Placement Activity - Report on “Logical Reasoning”

Class: AI2B

Date: 10-11-2025

Time: 1:30 to 4 PM

Activity: Logical Reasoning

A logical reasoning-based activity was conducted by the Department of AIML for AI2B – 3rd Semester AIML students to enhance their logical reasoning and problem-solving skills. The event was organized by V Semester AIML students. We explained logical reasoning by first giving a clear introduction about what logical reasoning means and why it is important for placement exams. We explained how logical reasoning helps in solving problems using thinking skills rather than memorization. Then, we discussed the different types of logical reasoning questions such as number series, puzzles, analogies, coding-decoding, blood relations, and direction sense. For each type, we gave simple examples so that students could understand the concept easily. We also showed how to identify patterns and how to approach the questions step by step. To make it interactive, we allowed students to answer sample questions and clarified their doubts. This method helped them understand the concepts in a practical and interesting way.

Examples of Logical Reasoning Questions

1. Number Series

Example: 2, 5, 8, 11, 14, ?

Answer: 17 (Pattern: +3 each time)

2. Alphabet Series

Example: A, C, F, J, O, ?

Answer: U (Pattern: +2, +3, +4, +5, +6)

3. Odd One Out

Example: Apple, Banana, Mango, Carrot

Answer: Carrot (because it is a vegetable, others are fruits)

4. Analogy

Example: Pen : Write :: Knife : ?

Answer: Cut (A pen is used to write just like a knife is used to cut)

5. Blood Relation

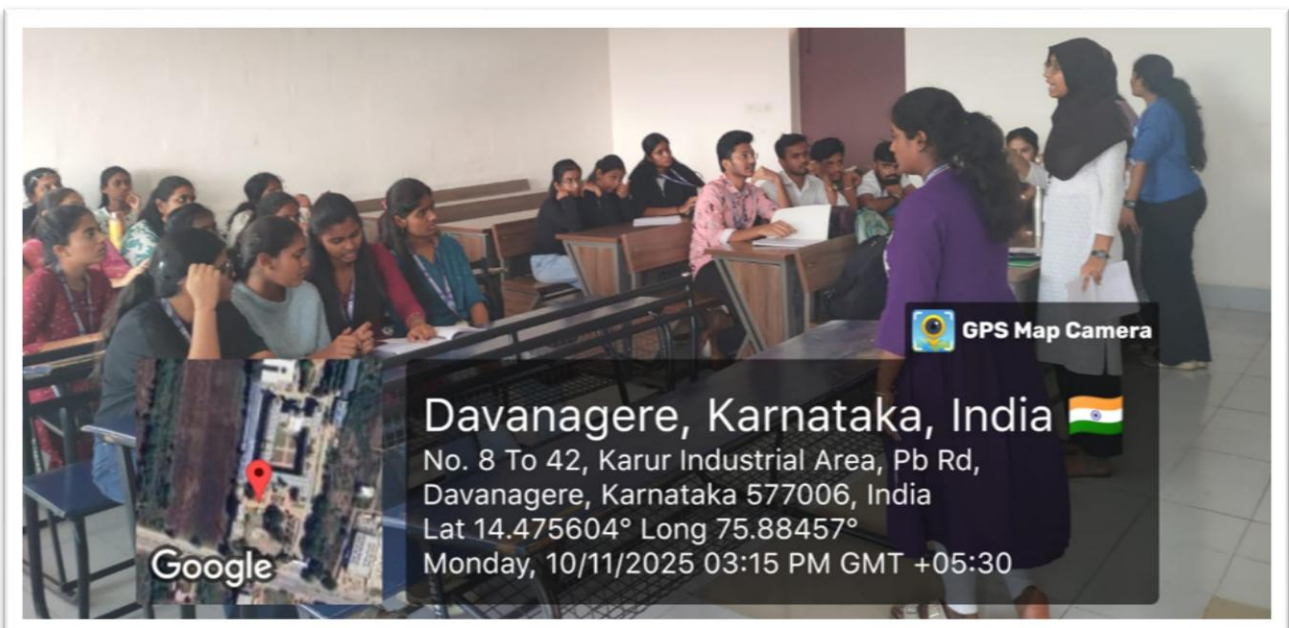

Example: A is the sister of B. B is the father of C. What is A to C?

Answer: Aunt

To make the session interactive, we organized an online quiz in which the students participated very actively and many of them scored excellent marks.

In addition to the quiz, we also arranged a treasure hunt inside the classroom that required teamwork, logical thinking, and problem-solving skills. The students were very enthusiastic throughout the activity and enjoyed participating in every task. Overall, the event was highly successful, and it helped the students improve their reasoning abilities while also promoting team spirit and active learning.
